

BUFFET

ALUMINIUM FOLDING MODULE SERIES

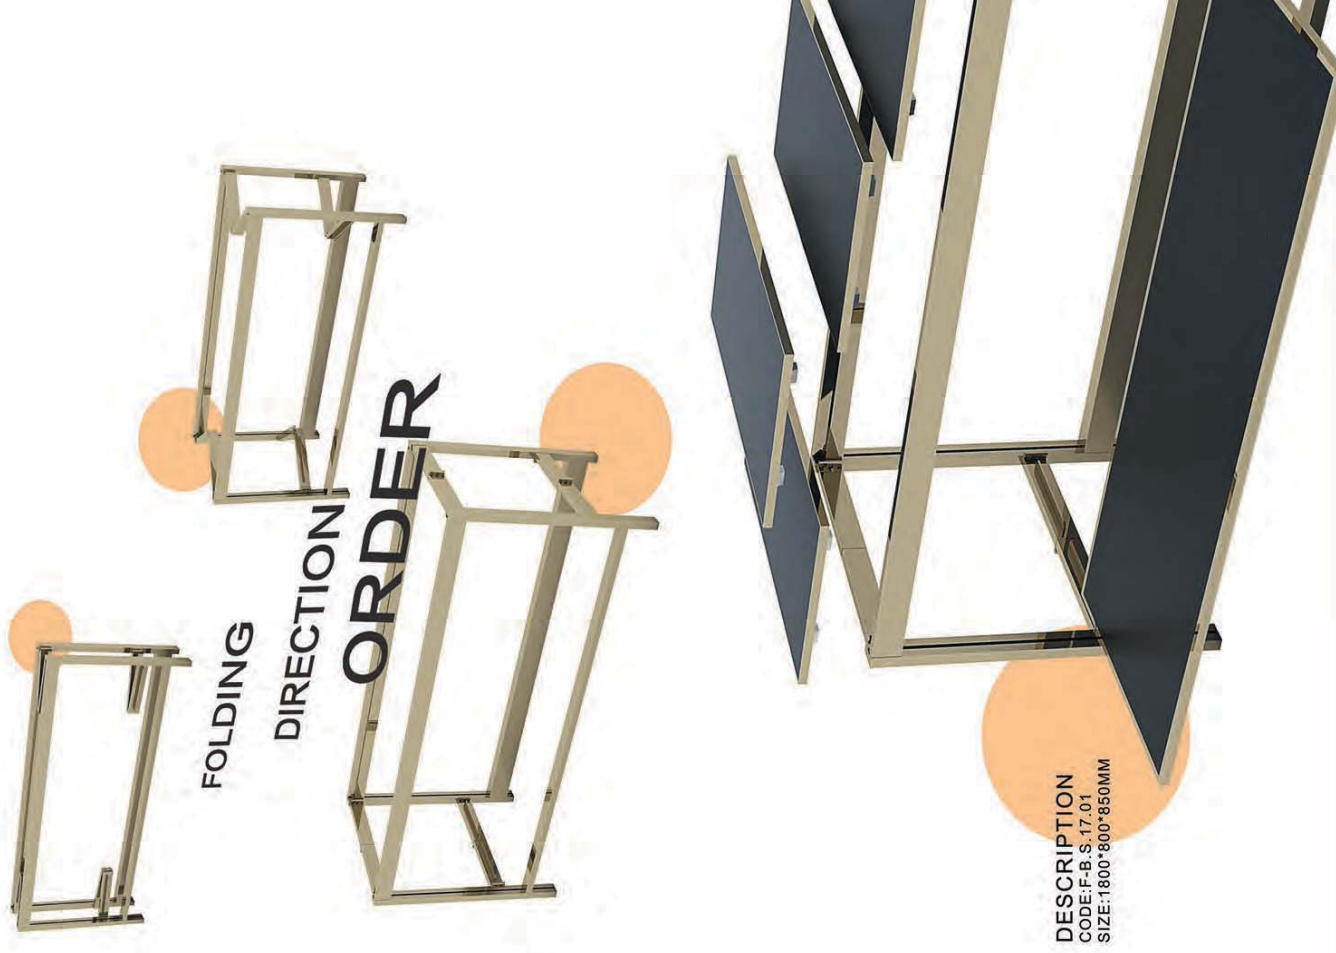

Material: super light, rust proof, insulation material and Aluminum Alloy frame edge, surface abrasion resistant scratch hardness and anti rust treatment, matte pits molding hardware.
Configuration: embedded removable free collocation type module, ultra light and wear-resistant (200 DEG C) import imitation stone surface, Aluminum Alloy molding, edge seamless Aluminum Alloy overall edge, full folding, without any auxiliary tools and accessories; hidden power line design patent;

SIZE:
800*800*850MM
CODE: F-B.S.17.01
BRAND: FERMANN

SALAD BAR SIDE STATION

Metal frame, the surface of wear-resistant, rust proof metal paint, wear-resistant, high temperature, corrosion resistant black panels.

DESCRIPTION
CODE: F-B.S.17.01

MATERIAL

One of the antique wooden vehicle display, can be used a variety of outdoor venues, simple and steady, occasionally on the surface of the tree also reflects the fresh and natural materials, both natural and no chemical pollution. Wood material selection, drying, finger joint, patchwork and other requirements are very strict. The natural properties of wood, such as mineral line, color and the texture change of needle, resin sac and other natural mark, make products more rich in natural beauty.

PROGRAMME

MATERIAL

《Fei》 is a combination of product conceptual design, the designer has been thinking about how to make users and designers have better communication and exchanges, so that they have a better product experience. With the combination of all the internal structure design of hollow wood at a glance, on behalf of designer image to completely open up the idea. The combination of high and low makes the product have good flexibility in actual use, and the product also ensures diversification.
